

Summer 2023 Course Descriptions

Power of Music #1150 This course will explore the way music makes us feel and the effect it can have on our lives. Students will identify their interests and personalities then write a theme song which best represents them as individuals.

Finding Out Why #1014 - Students interested in science and nature will love this hands-on course using science experiments to explain the natural world. We will learn the Scientific Method through a weekly experiment performed in class. The students will participate and observe the experiment then form conclusions about what is observed.

Hot Topics #2009 – Let’s turn up the heat! In this debate class students will drive the conversation by introducing the topics that concern them and discussing possible solutions to our most pressing questions.

Brain Games #1081 - Challenge your brain with mind bending games designed to exercise memory, lengthen attention and to increase critical thinking.

Creative Art/Fabric printmaking #1029 - This project based class is for students interested in using paper and printmaking techniques to explore pattern and design on fabric. In this class our students will learn to develop a love of art and design artwork based on their individual creativity.

Poetry #1093 - This class will focus on developing student creativity through writing and discussion. We will cover various poetry formats, read and discuss famous poets and then create our own poems.

Summer Blockbuster #2005 – In this class students will discuss and review why movie fans excitedly await the arrival of the summer seasons epic showdowns. We will critique our favorite summer blockbusters to discover why the dark knight battling the joker or a great white shark terrifying unsuspecting beachgoers will live forever in our minds. What’s the formula needed to make it a summer blockbuster and how do the marketing and promotions for these films keep us on the edge of our seats.

SLC Playlist #1167 This class will develop a playlist based on genres and student’s favorite songs. Students will act as DJ’s and introduce their favorite songs to the class.

Marketing 101/Creative writing #2006 –This class will introduce students to the principles of Advertising. Using the SLC First Street Gallery as the backdrop and their individual artwork as the product, students will learn about developing a “call to action” by creating slogans, taglines, and media ads in preparation for our first summer sale in the Warwick Gallery.

The art of advertising #2007 – In this art class students will learn to create eye catching designs for the purpose of advertising. We will take a tour of local businesses, design promotional flyers and marketing material to help us get the word out and promote the handmade artwork available in our gallery.

Show me the money #2008 – We wrote the advertisements; we designed the posters and decorated our windows now it’s time to make some sales. How much is that painting in the window? Can you make change? Do you take credit cards? These questions will be answered in this money making math class. Students of all levels will benefit from this numbers driven course. All proceeds will be donated to Clary Garden, a nonprofit 501(c)(3) whose mission is to support education for all learners. There is nothing better than a sale to help our students learn to love math.
